INDEX.

Académie de Paris, 76.
——— des Sciences, Annual Award of Prizes, 126.
Algebra of Coplanar Vectors and Trigonometry, by R. B. Hayward, M. Bôcher, 111.
American Association for the Advancement of Science, Proceedings of the Madison Meeting, 76; Report of Brooklyn Meeting, E. M. Blake, 16; Springfield Meeting, 127.
——— Mathematical Society, Its Past and Future (Presidential Address.), E. McClintock, 85.
Annual Meeting of the Society, 96.
——— List of Published Papers, 266.
Apolar Triangles on a Conic, F. Morley, 116.
Arthur Cayley, C. A. Scott, 133.
Authors of Articles in the Bulletin:
Blake, 16.
Bôcher, 111, 205.
Brooks, 241.
Brown, 232.
Cajori, 52, 180.
Cayley, 94.
Dickson, 184.
Fiske, 1, 76.
Harkness, 248.
Haskell, 155.
Johnson, 193.
Klein, 165.
McClintock, 85.
Miller, 67, 124, 255.
Moore, 61, 252.
Morley, 116, 235.
Osgood, 142.
Perott, 217.
Pierpont, 196.
Roberts, 105.
Schlegel, 33.
Scott, 133.
Study, 6.
White, 11.
Ziwet, 73, 125, 186.
Beneke Prize of the University of Göttingen, 190.
Berlin, University of, 21, 210.
Bibliography, 23, 56, 80, 99, 128, 161, 190, 213, 238, 261.
Binary Quadric and n-ic, Reduction of their Resultant by Virtue of its Semi-combinant Property, H. S. White, 11.
——— Quartics and Elliptic Functions, on the Connection between, E. Study, 6.
Binomial Theorem, Was it Engraven on Newton's Monument? F. Cajori, 52.
Blake (E. M.): The Meeting of the American Association for the Advancement of Science, 16.
Bôcher (M.): Gauss's Third Proof of the Fundamental Theorem of Algebra, 205; Hayward's Vector Algebra, 111.
Boncompagni, Prince, 23, 79.
Briefer Notices, 73, 125.
British Association for the Advancement of Science, 20, 260.
Brooks (J. M.): Lie's Continuous Groups, 241.
Brown (G. L.): Note on Hölder's Theorem concerning the Constancy of Factor-groups, 232.
Cajori (F.): The Multiplication of Semi-convergent Series, 180; Was the Binomial Theorem Engraven on Newton's Monument? 52.
Cambridge, University of, 160.
——— University Press, 56.
Canonical Forms, On a Certain Class of, R. A. Roberts, 105.
Card Catalogue of Mathematical Literature, A. Ziwet, 186.

Cayley (A.): Note on a Memoir in Smith's Collected Papers, 94.
——— Arthur, C. A. Scott, 133.
Characteristics with Denominator 2, Theorem concerning p-rowed, E. H. Moore, 252.
Central Orbits, Kinetic Stability of, W. W. Johnson, 193.
Certain Class of Canonical Forms, R. A. Roberts, 105.
Chicago, University of, 259, 260.
Clark University, 127.
Cockle, Sir James, 160.
Cole, F. N., 189.
Columbia College, 189, 210, 237.
Conic, Apolar Triangles on a, F. Morley, 116.
Continuous Groups, by S. Lie, J. M. Brooks, 241.
Cornell University, 211.
Cours d'Analyse, by M. Jordan, J. Harkness, 248.
Dickson (L. E.): Gergonne's Pile Problem, 184.
Dictionary of Mathematics, 210.
Doolittle, C. L., 189.
Eddy, H. T., 77.
Election of Officers, 96.
Elliptic Functions, On the Connection between Binary Quartics and, E. Study, 6.
Factor-groups, Hölder's Theorem concerning the Constancy of, G. L. Brown, 232.
Fiske (T. S.): Briefer Notices, 76; The Summer Meeting of the American Mathematical Society, 1.
Forms, on a Certain Class of Canonical, R. A. Roberts, 105.
Forsyth, A. R., 160.
Forsyth's Theory of Functions, W. F. Osgood, 142.
Franklin, F., 237.
French Association for the Advancement of Science, 21.
Fundamental Theorem of Algebra, Gauss's Third Proof of the, M. Bôcher, 205.
Functions, Forsyth's Theory of, W. F. Osgood, 142.
——— On the Introduction of the Notion of Hyperbolic, M. W. Haskell, 155.
Gauss's Third Proof of the Fundamental Theorem of Algebra, M. Bôcher, 205.
Gauthier-Villars, 79.
Gergonne's Pile Problem, L. E. Dickson, 184.
German Mathematical Association, 78.
——— Mathematical Society, Proceedings, vol. III, 75.
Gorton, W. C. L., 77.
Göttingen, University of, 55, 127, 190, 238.
Grassmann's Collected Works, 73.
Group, Instance where a Well-known Test to Prove Simplicity is Insufficient G. A. Miller, 124.
——— of Holoedric Transformation of a Given Group into Itself, E. H. Moore, 61.
Groups, Lie's Continuous, J. M. Brooks, 241.
———of Degree Ten, On the Non-primitive Substitution, G. A. Miller, 67.
——— of Degree Twelve, Note on Transitive Substitution, G. A. Miller, 255.
Harkness (J.): Jordan's Cours d'Analyse, vol. II, 248.
Harvard University, 212.
Haskell (M. W.): On the Introduction of the Notion of Hyperbolic Functions, 155.
Hayward's Vector Algebra, M. Bôcher, 111.

Helmholtz, 23.
Hertz's Collected Works, 73.
Hilbert, D., 127.
Hlasko, V. A.; Exhibition of Models, 77.
Hölder's Theorem concerning the Constancy of Factor-groups, G. L. Brown, 232.
Holoedric Transformation of a Given Group into Itself, On the Group of, E. H. Moore, 61.
Hyperbolic Functions, On the Introduction of the Notion of, M. W. Haskell, 155.
Instance where a Well-known Test to Prove the Simplicity of a Simple Group is Insufficient, G. A. Miller, 124.
Intermédiaire des Mathématiciens, 210.
Introduction of the Notion of Hyperbolic Functions, M. W. Haskell, 155.
Jablonowski Society of Leipzig, 22.
Jahresbericht der Deutschen Mathematiker-Vereinigung, vol. III, 75.
Johns Hopkins University, 237, 260.
Johnson (W. W.): Kinetic Stability of Central Orbits, 193.
Jordan's Cours d'Analyse, vol. II, J. Harkness, 248.
Kazàn, Celebration of the One Hundredth Anniversary of the Birth of Lobachèvsky, 125.
Kinetic Stability of Central Orbits, W. W. Johnson, 193.
Kirkman, T. P., 210.
Klein (F.): Riemann and his Significance for the Development of Modern Mathematics, 165.
Lagrange's Place in the Theory of Substitutions, J. Pierpont, 196.
Leipzig, University of, 211.
Lie's Continuous Groups, J. M. Brooks, 241.
Livret de l'Étudiant de Paris, 76.
Lobachèvsky Memorial Volume, 125.
London Mathematical Society, 78.
Macmillan & Co., 55.
McClintock (E.): The Past and Future of the American Mathematical Society (Presidential Address.), 85.
Massachusetts Institute of Technology, 259.
Meeting, American Association for the Advancement of Science, 16.
——— American Mathematical Society, 1, 54, 77, 96, 126, 160, 189, 209, 237.
——— British Association for the Advancement of Science, 20, 260.
——— French Association for the Advancement of Science, 21.
——— German Mathematical Association, 78.
——— London Mathematical Society, 78.
Meissel, E. D. F., 210.
Miller (G. A.): An Instance where a Well-known Test to Prove the Simplicity of a Simple Group is Insufficient, 124; On the Non-primitive Substitution Groups of Degree Ten, 67; Note on the Transitive Substitution Groups of Degree Twelve, 255.
Minimum Sum of the Distances of a Point from Given Points, On the Problem of, V. Schlegel, 33.
Minnesota, University of, 78.
Models, Portraits of Mathematicians, 127.
Moore (E. H.): On the Group of Holoedric Transformation of a Given Group into Itself, 61; On a Theorem concerning p-rowed Characteristics with Denominator 2, 252.
Morley (F.): Apolar Triangles on a Conic, 116; Note on the Theory of Three Similar Figures, 235.
Multiplication of Semi-convergent Series, F. Cajori, 180.
New Members of the Society Elected, 1, 54, 77, 126, 160, 189, 209, 237.
——— Publications, 23, 56, 80, 99, 128, 161, 190, 213, 238, 261.

Newcomb, S, 259.
Newton's Monument, Was the Binomial Theorem Engraven on it? F. Cajori, 52.
Non-primitive Substitution Groups of Degree Ten, G. A. Miller, 67.
Note on a Memoir in Smith's Collected Papers, A. Cayley, 94.
Notes, 20, 54, 77, 96, 126, 160, 189, 209, 237, 259.
Numbers, The Theory of, by M. Stieltjes, J. de Perott, 217.
Officers Elected at the Annual Meeting, 96.
Oliver, J. E., 189.
Orbits, Kinetic Stability of Central, W. W. Johnson, 193.
Osgood (W. F.): Forsyth's Theory of Functions, 142.
Papers, Annual List of Published, 266.
—— and Communications Presented to the Society. Authors:
Blake, 209.
Echols, 237.
Hall, 160.
Halsted, 2.
Haskell, 97.
Hill, 55.
Johnson, 209.
Macfarlane, 126.
Martin, 237.
McClintock, 2, 55, 97.
Moore, 2, 77.
Morley, 2, 126, 237.
Peirce, 77.
Roberts 97, 189.
Schlegel, 2.
Taber, 126.
White, 2.
Woodward, 2, 209.
Paris Academy of Sciences, 126.
—— University of, 76.
Past and Future of the American Mathematical Society, E. McClintock, 85.
Pennsylvania, University of, 189.
Perott (J. de): Stieltjes's Theory of Numbers, 217.
Pierpont (J.): Lagrange's Place in the Theory of Substitutions, 196.
Pile Problem, Gergonne's, L. E. Dickson, 184.
Prizes of the French Academy, 126.
—— of the Jablonowski Society, 22.
Problem of the Minimum Sum of the Distances of a Point from Given Points, V. Schlegel, 33.
Proceedings of the Society, 1, 54, 77, 96, 126, 160, 189, 209, 237.
Publications, New, 23, 56, 80, 99, 128, 161, 190, 213, 238, 261.
Reduction of the Resultant of a Binary Quadric and n-ic by Virtue of its Semi-combinant Property, H. S. White, 11.
Répertoire Bibliographique des Sciences Mathématiques, A. Ziwet, 186.
Report of Meeting of the American Association for the Advancement of Science, E. M. Blake, 16.
—— of the Summer Meeting of the American Mathematical Society, T. S. Fiske, 1.
—— of the Treasurer for 1894, 97.
Resultant of a Binary Quadric and n-ic, Reduction by Virtue of its Semi-combinant Property, H. S. White, 11.
Riemann and his Significance for the Development of Modern Mathematics, F. Klein, 165.
Ritter, E., 211.
Roberts (R. A.): On a Certain Class of Canonical Forms, 105.
Sampson, Low & Co., 56.
Schläfli, Professor, 210.
Schlegel (V.): On the Problem of the Minimum Sum of the Distances of a Point from Given Points, 33.
Scott (C. A.): Arthur Cayley, 133.
Semi-convergent Series, Multiplication of, F. Cajori, 180.
Similar Figures, Note on the Theory of Three, F. Morley, 235.
Simple Group, Instance where a Well-known Test is Insufficient, G. A. Miller, 124.

Smith's Collected Papers, Note on a Memoir in, A. Cayley, 94.
Springfield Meeting of the Society, 160.
Stieltjes: Sur la Théorie des Nombres, J. de Perott, 217.
Strassburg, University of, 127.
Study (E.): On the Connection between Binary Quartics and Elliptic Functions, 6.
Substitution Groups of Degree Ten, Non-primitive, G. A. Miller, 67.
——— Groups of Degree Twelve, Note on Transitive, G. A. Miller, 255.
Substitutions, Lagrange's Place in the Theory of, J. Pierpont, 196.
Summer Meeting of the American Mathematical Society, 1.
Syracuse University, 259.
Tchébichef, P. L., 99.
Teubner, B. G., 209.
Theorem concerning p-rowed Characteristics with Denominator 2, E. H. Moore, 252.
Theory of Functions, Forsyth's, W. F. Osgood, 142.
——— of Numbers, by M. Stieltjes, J. de Perott, 217.
——— of Substitutions, Lagrange's Place in the, J. Pierpont, 196.
Three Similar Figures Note on the Theory of, F. Morley, 235.
Transformation of a Given Group into Itself, On the Group of Holoedric, E. H. Moore, 61.
Treasurer's Report for 1894, 97.
Vector Algebra, Hayward's, M. Bôcher, 111.
Weber, H., 127.
Weierstrass, K., 190.
White (H. S.): Reduction of the Resultant of a Binary Quadric and n-ic by Virtue of its Semi-combinant Property, 11.
